Summary

Java Backend Developer with hands-on experience building scalable applications using Spring Boot and PostgreSQL. Skilled in REST API development, backend architecture, and secure application design. Strong interest in Java backend engineering and Data Structures & Algorithms with consistent DSA practice.

Education

Prof. Ram Meghe Institute of Technology and Research, Amravati *2023 – 2027*

- B.Tech in Information Technology | CGPA: 8.63 / 10

Harikisan Maloo International School, Amravati *March 2023*

- HSC – Science (MH Board) | Percentage: 73.67 / 100

Technical Skills

- **Languages:** C, C++, Java, JavaScript
- **Frontend:** React.js, HTML5, CSS3
- **Backend:** Spring Boot, Spring MVC, RESTful APIs
- **Databases:** PostgreSQL, MongoDB
- **Tools & Platforms:** Git, GitHub, Postman, IntelliJ IDEA, VS Code
- **Core Concepts:** OOP, Data Structures & Algorithms, OS, CN, DBMS

Projects

QuickPoll – Full-Stack Polling Application

Spring Boot, React.js, PostgreSQL, JWT, Spring Security, JPA

- Developed a full-stack polling platform enabling users to create polls, vote, comment, and like with secure JWT-based authentication and seamless React frontend integration.
- Implemented Spring Security with a custom JWT filter, BCrypt password hashing, and role-based access control to secure all REST API endpoints and enforce fine-grained authorization.
- Designed optimized JPA entity relationships and applied the DTO pattern with Axios interceptors to ensure efficient, secure data flow and seamless token-based frontend-backend communication.

Hospital Management System – Backend

Spring Boot, Spring Data JPA, PostgreSQL, REST APIs

- Built a Hospital Management System backend with REST APIs for Doctors, Patients, Appointments, and Billing, following a modular layered architecture using Spring Boot and Spring Data JPA.
- Implemented appointment scheduling with double-booking prevention enforced via a unique `(doctor_id, date, time)` database constraint, ensuring data integrity at the schema level.
- Developed automatic bill calculation from doctor consultation fees and an API to retrieve doctor schedules by date, streamlining hospital administrative workflows end-to-end.

Achievements & Extracurriculars

- **1st Place, National-Level Coding Competition – PRMIT&R Techfest:** Outperformed top participants across institutions to secure 1st rank in a competitive coding contest.
- **4th Rank, Codorithm – National-Level Coding Competition, Sipna College of Engineering:** Demonstrated strong problem-solving skills in a competitive multi-institution contest.
- **160-Day Coding Streak – GeeksforGeeks:** Earned official recognition and rewards for exceptional consistency and dedication to daily competitive programming practice.
- **DSA Domain Member, Google Developer Group PRMIT&R (2025–2026):** Mentored peers in DSA and participated in technical events under GDG.
