Career Objective

Final-year Information Technology student with practical experience in Java, Spring Boot, REST APIs, and modern web development through real-world projects and internship experience. Passionate about writing clean, scalable code and solving complex problems while contributing effectively to software development teams.

Experience

First-Buy Rewards *March 2026 – August 2026*

Software Development Intern · Remote

- Integrated **Google OAuth 2.0** for user authentication using React.js and Spring Boot, replacing manual login and eliminating password storage security risks for production users.
- Built a **contact popup with embedded Google Form integration**, enabling direct owner communication without additional backend infrastructure.
- Developed a user-specific **Saved Homes** feature, enabling users to save and revisit preferred properties via **REST APIs** with seamless frontend-backend integration.

Education

Prof. Ram Meghe Institute of Technology and Research, Amravati *2023 – 2027*

- B.Tech in Information Technology | CGPA: 8.63 / 10

Harikisan Maloo International School, Amravati *March 2023*

- HSC – Science (MH Board) | Percentage: 73.67 / 100

JBES, Chandur Railway *March 2021*

- SSC – (MH Board) | Percentage: 93.80 / 100

Technical Skills

- **Languages:** Java, C++, C, JavaScript
- **Frameworks/Libraries:** Spring Boot, Spring MVC, React.js
- **Databases:** PostgreSQL (Relational), MongoDB
- **Core CS Concepts:** OOP, Operating Systems, Computer Networks, DBMS
- **Tools & Platforms:** Git, GitHub, Postman, IntelliJ IDEA, VS Code

Projects

MessFinder – Full-Stack Tiffin Discovery App Github

- Built a full-stack tiffin discovery platform with JWT-based role authentication (Student / Mess Owner / Admin), Gemini AI review summarization, Cloudinary image uploads, and a dedicated Admin dashboard.
- Implemented mess search, price filtering, and rating-based sorting with RESTful APIs and role-based access control to help students find affordable mess services.

Hospital Management System – Backend Github

- Built a RESTful backend covering Doctors, Patients, Appointments, and Billing with a clean layered architecture using Spring Boot and Spring Data JPA.
- Enforced double-booking prevention via a unique `(doctor_id, date, time)` constraint and automated bill generation from consultation fees end-to-end.

Achievements & Extracurriculars

- **1st Place, PRMIT&R Techfest:** Secured 1st rank in a national-level coding competition outperforming participants across institutions.
- **4th Rank, Codorithm – Sipna College:** Demonstrated strong problem-solving in a national-level multi-institution contest.
- **160-Day Coding Streak – GeeksforGeeks:** Earned official recognition for consistency in daily competitive programming.
- **DSA Domain Member, GDG PRMIT&R (2025–2026):** Mentored peers in DSA and participated in technical events under GDG.
