SRUSHTI MANISH DESHMUKH

+91-8080489363 | deshmukhsrushti81@gmail.com

PROFESSIONAL SUMMARY

Motivated B.Tech Artificial Intelligence & Data Science student with hands-on experience in Python, machine learning, and data analytics, backed by practical work in ETL pipelines and predictive modeling. Skilled in building end-to-end solutions — from automated trading systems to cross-platform mobile apps and Excel/Power BI-driven dashboards. Strong foundation in networking, cloud services, and cybersecurity, with a passion for applying emerging technologies to solve real-world problems.

EDUCATION

Prof. Ram Meghe Institute of Technology and Research, Badnera-Amravati *2023 – 2027*
B.Tech – Artificial Intelligence & Data Science | CGPA: 7.64

INTERNSHIP EXPERIENCE

Data Analytics Intern | *Bluestock Fintech* *May 2026 – Present*
- Worked on production-grade analytics capstone projects involving Python-based ETL pipelines, SQLite databases, and dashboard reporting (Power BI, Streamlit).
- Collaborated within a structured cohort-based internship to deliver end-to-end data analytics solutions from raw data to business-ready insights.

Cybersecurity Intern | *Cisco Networking Academy* *Jun 2025 – Aug 2025*
- Developed a college network topology using Cisco Packet Tracer, implementing VLANs, routing, and basic security configurations.

AI-ML Virtual Internship | *AICTE* *Jul 2024 – Sep 2024*
- Built and evaluated ML/DL models on real-world datasets covering ANN, CNN, and model optimization techniques; used Python, NumPy, Pandas, and Scikit-learn for preprocessing, implementing Linear Regression, Decision Trees, and SVM.

Android Developer Virtual Internship | *AICTE* *Oct 2024 – Dec 2024*
- Built Android applications implementing UI/UX design, Activities, Intents, Fragments, and XML layouts with Material Design components.

Generative AI Virtual Internship | *AICTE* *Jan 2025 – Mar 2025*
- Built a Text Generator/Chatbot using LLMs and Prompt Engineering techniques with GenAI tools.

Networking Cloud Internship | *AICTE* *Apr 2025 – Jun 2025*
- Built and tested firewall rules and network security protocols; configured cloud services and VMs on AWS/Azure and simulated network topologies using Cisco Packet Tracer.

Python Programming Intern (Trainee Developer) | *iBase Electrosoft LLP* *7-Day Internship*
- Gained hands-on experience in Python fundamentals — variables, loops, functions, and OOP — under professional industry guidance.

PROJECTS

Mobile App — *JavaScript (React Native, Expo)*
- Developed a cross-platform iOS/Android app with multi-screen navigation (React Navigation), modular reusable UI components, and React Hooks for state management across 3 responsive screens.

AI-Based Breast Cancer Prediction — *Python*
- Built an ANN model achieving 97.4% accuracy using TensorFlow/Keras on the WBCD dataset to classify tumors; deployed via a Flask REST API connected to a live web interface.

Simplified Binance Futures Trading Bot — *Python*
- Built a CLI-based automated trading bot integrating the Binance Futures Testnet API for market/limit orders, with robust input validation, error/API-call logging, and .env-secured credentials.

Mutual Fund Analytics Platform — *Python, Pandas, SQLite, Power BI*
- Built an end-to-end analytics pipeline on AMFI/mfapi.in mutual fund data (ingestion, cleaning, EDA); designed a raw/processed SQLite architecture and delivered investment insights via a Power BI dashboard.

SKILLS SUMMARY

Programming & Web: Python, Pandas, NumPy, SQL, HTML, JavaScript (Basic)
Frameworks & Databases: MySQL, SQLite
Operating Systems: Windows, Linux
Tools & Methodologies: AWS, Excel, Power BI, Git/GitHub, Jupyter Notebook, VS Code, OOP, DSA

CERTIFICATIONS

Fundamentals of Deep Learning (NVIDIA) • Python 3.4.3 (IIT Bombay) • Python for Machine Learning (IIT Bombay) • JavaScript (IIT Bombay) • CCNA (Cisco) • Cybersecurity Essentials (Cisco Networking Academy) • IIOT Course (Cisco Networking Academy) • Build Your Own Gen AI Model (NXTWAVE) • Data Analytics Job Simulation (Deloitte) • Gen AI & Cloud Computing (IBM AICTE)
