CAREER OBJECTIVE

Final-year B.Tech student in Artificial Intelligence and Data Science with hands-on experience building, evaluating, and deploying machine learning models in Python. Strong foundation in data preprocessing, exploratory data analysis, and interactive tool development. Seeking an entry-level data science/machine learning role to deliver real-world, data-driven solutions.

SKILLS

Programming Languages: Python, SQL

Data Science & ML Libraries: Pandas, NumPy, Scikit-learn, Matplotlib

Databases: MySQL

Tools & Platforms: Git, GitHub, Jupyter Notebook

Core Concepts: Data Structures & Algorithms (DSA), Machine Learning, Deep Learning Fundamentals

PROJECTS

AI-Based Breast Cancer Prediction | Python, Pandas, NumPy, Scikit-learn, Matplotlib

- Built and evaluated a machine learning classification model using Scikit-learn to predict breast tumours as benign or malignant from clinical diagnostic features, including preprocessing and feature analysis.
- Designed and built an interactive interface for real-time predictions, improving model usability for non-technical users.

E-Commerce Inventory Management System | Python, MySQL

- Developed a Python and MySQL-based inventory management system with CRUD operations to manage product records, stock updates, and inventory tracking.
- Implemented database connectivity and core product management functionality, streamlining inventory workflows.

EDUCATION

B.Tech. Artificial Intelligence and Data Science | Prof. Ram Meghe Institute of Technology and Research, Badnera-Amravati | CGPA: 8.04 | 2027

HSC – PCMC (Computer Science) | Sharada P.U. College, Mangalore | Percentage: 88.5% | 2022

SSC | Vidyadayinee Eng. Med. School, Mangalore | Percentage: 87.2% | 2020

CERTIFICATES

- Data Analytics Essentials – Cisco Networking Academy
- Python Trainee Developer – iBASE Electrosoft LLP
- Fundamentals of Deep Learning – NVIDIA
